重点加拿大农业食品开发项目招商目录

项目名称:加拿大纯天然肉牛生产基地

Beef Cattle Farm

项目类型:新建股份有限公司

Co. Ltd

投资方式: 合资

Joint Venture

所属行业:农、林、牧渔业

Agriculture and Animal

Husbandry

项目地点:加拿大安大略省

Ontario, Canada

建设该项目优势条件:

随着国内生活水平的提高,人均牛肉消耗量直线上涨。我国的肉牛养殖分布在东北三省、山东和内蒙古等北部地区,由于近年来草原地区草地干旱退化,加上沙化、碱化,可以提供给肉牛的可食牧草越来越少,草场载畜量大大降低,饲料资源匮乏已经成为草原地区的主要矛盾。加之国内人多地少等因素,制约着国内的肉牛养殖业的发展。加拿大地大人稀,土地资源丰富,气候条件适合肉牛的养殖培育。同时,该项目可以促进当地经济增长、增加就业,符合安省农业集体移民项目的要求。

With the increasing quality of human life, the consumption of beef in China has been raising dramatically. The beef cattle farms distribute in the Northern China, including Heilongjiang, Liaoning, Jilin, Shandong and Inner Mongolia. However, because of the grassland desertification, degeneration and alkalization in recent years, the forage for cattle has been decreasing. The decreasing number of forage, as well as the large population with limited grassland area, restricted the development of beef cattle industry in China. Canada, on the other hand, has large grassland proportion with little population, and the weather/environment is suitable for raising cattle. Therefore, Canada is a perfect choice to run a beef cattle farm. Additionally, because the beef cattle farm can play a positive role in economic and increase employment, Ontario government legitimated it into an immigration program.

项目描述:

加拿大中国农业与食品发展交流中心多年为加拿大大型肉牛养殖和牛肉加工厂提供业务咨询服务,对肉牛产业有着深刻的了解。中心现寻求投资者合作,在加拿大安大略省建立一个年产规模在三到五万中国亩的肉牛养殖基地。肉牛场采取无添加、纯天然的放养模式,估计产量可到每年达到十五万头左右。请有意者与中心咨询联系。

Canada China Agriculture Center has involved in consulting and supporting of beef cattle farms for many years, and equipped with a comprehensive understanding of the beef cattle industry. Now we are looking forward investors to set up a beef cattle farm with the acreage of 30K to 50K Chinese Mu. The farm would implement additive-free and free range modules, yielding 150k cattle. If you are interested in the program, please contact us.

项目名称:加拿大优质大豆生产加工基地

Soybean producing and processing center

项目类型:新建股份有限公司

Co. Ltd

投资方式: 合资

Joint Venture

所属行业:农、林、牧渔业

Agriculture and Animal Husbandry

项目地点:加拿大安大略省

Hamilton, Ontario, Canada

建设该项目优势条件:

加拿大安大略省南部气候温和,大豆生产量占加拿大百分之八十以上。目前加拿大优质大豆多出口日本。哈密尔顿市气候适宜、水路交通便利,是加拿大大豆生产、加工贸易最大的生产地。国务院办公厅于 2 月

10 日印发了《中国食物与营养发展纲要(2014-2020 年)》,明确"传承以植物性食物为主、动物性食物为辅的优良膳食传统"。随着国内消费者越来越注重养生,大豆产业的发展前进广阔,2013年,我国进口了 6338 万吨的大豆,同比增加 8.6%,进口量创历史新高,中国已成为全球头号大豆购买国。该项目不仅可以弥补国内产量需求,可以促进加拿大经济增长、增加就业,符合安省农业集体移民项目的要求。

With moderate weather, Northern Ontario yielded 80 percent output of soybean in Canada. The high quality soybean was usually exported to Japan. Due to the suitable weather and convenience transportation, Hamilton owns the largest producing and processing base of soybean in Canada. According to updating released rules in China, the Chinese government would support soybean industry. In 2013, China imported 6338 ton soybean, increased 8.6 percent within the same period in the year before. The high consuming amount plus increasing concerns of health guarantee the prominent future of soybean industry. The program could benefit from the increasing demand of soybean. Moreover, because this program can play a positive role in economic and increase employment, Ontario government legitimated the program into an immigration program.

加拿大中国农业与食品发展交流中心长期与加拿大大豆种植、收购、出口商有着紧密联系,对大 豆种植、生产、加工有着深刻的了解。中心现寻求投资者合作,在加拿大安大略省建立一个规模 在五万中国亩的大豆生产加工基地。从种植、生产、加工、包装到出口采取一条龙的流水线运作 模式。请有意者与中心咨询联系。

Canada China Agriculture Center has long term relationships with the cultivators, purchasers and exporters, and equipped with a comprehensive understanding of the soybean industry. Now we are looking forward investors to set up a producing and processing center of soybean with the acreage of 50K Chinese Mu. The center would implement a pipeline module from cultivating, producing, processing, and packaging to exporting. If you are interested in the program, please contact us.

项目名称:加拿大牧草种植出口基地

Forage Grass Cultivation Center

项目类型:新建股份有限公司

Co. Ltd

投资方式: 合资

Joint Venture

所属行业: 农、林、牧渔业

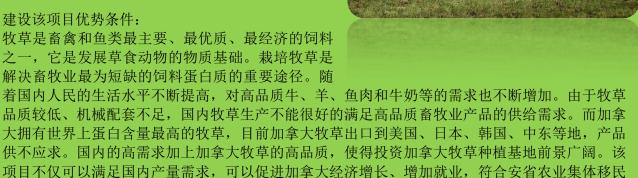

Agriculture and Animal Husbandry

项目地点:加拿大安大略省或者加拿大其他省份

Hamilton, Ontario, Canada

建设该项目优势条件:

牧草是畜禽和鱼类最主要、最优质、最经济的饲料 之一,它是发展草食动物的物质基础。栽培牧草是 解决畜牧业最为短缺的饲料蛋白质的重要途径。随

Forage grass is the main fodder for livestock /poultry and fish, with economic benefits and high quality. Forage grass is important for herbivorous animal. Cultivating forage grass could solve the problem of lacking protein foodstuffs to feed livestock and poultry. The live quality has been dramatically increasing in China for recent years, and so does the demand for high quality beef, mutton, fish and milk. Because of the pollution, desertification, and degeneration of grassland and the out of date technology, the production of forage grass cannot fulfill the demand of high quality forage for livestock and poultry. However, the forage grass in Canada contains the highest volume of protein all around the world and has been exported to the U.S., Japan, Korea, Middle East and etc. Therefore, the high demand in China and the high quality brought a promising future for forage grass industry in Canada. The program could benefit from the increasing demand of forage grass. Moreover, because this program can play a positive

role in economic and increase employment, Ontario government legitimated the program into an immigration list.

项目描述:

加拿大-中国农业与食品发展交流中心是加拿大牧草协会成员,多次参加协会重要会议,对牧草产业有着深刻的了解。中心现寻求投资者合作,在加拿大安大略省建立一个规模在五万到十万中国亩的牧草生产加工出口基地。从种植、生产、加工、包装到出口采取一条龙的流水线运作模式。请有意者与中心咨询联系。

Equipped with a comprehensive understanding of the forage grass industry, Canada China Agriculture Center is the membership of Canada Forage and Grassland Association, and joined numerous important meetings. Now we are looking forward investors to set up a cultivation center of forage grass with the acreage from 50K to 100K Chinese Mu. The center would implement a pipeline module from cultivating, producing and processing to exporting. If you are interested in the program, please contact us.

项目名称:加拿大天然水稻生产出口基地

Rice Cultivation Center

项目类型:新建股份有限公司

Co. Ltd

投资方式: 合资

Joint Venture

所属行业: 农、林、牧渔业

Agriculture and Animal Husbandry

项目地点:加拿大安大略省

Hamilton, Ontario, Canada

建设该项目优势条件:

1962 年,加拿大科学家在已经在加拿大的哈密顿地区成功实验了水稻种植,由于当时移民不多,市场潜力不大,

水稻种植并没有在当时蓬勃发展起来。随着政策的开放,加拿大如今成为了世界上最大的移民国家,其中以大米为主食的亚裔移民占加拿大移民的最大比例。加拿大每年需要进口大量大米。而加拿大的自然条件良好,土壤、气候和水分都适宜水稻的种植,因此在加拿大建立水稻生产基地有着广阔的市场。除了良好的经济效益之外,该项目还可以促进加拿大经济增长、增加就业,符合安省农业集体移民项目的要求。

In 1962, scientists in Canada successfully cultivated rice in Canada. The rice industry did not grow rapidly because of the limited number of immigration, which restricted the number of target customer base. With the open immigration policy, Canada becomes the largest immigration country in the world, the immigration including a majority number of Asian, whose staple food is rice. Such change has resulted that Canada has to import a lot of rice from Asia. The earth, weather, and water resources in Canada are suitable to cultivate rice. Therefore, building a rice cultivation center has a promising future in Canada. Except the economic benefits, the center can play a positive role in economic and increase employment; Ontario government legitimated this program into an immigration list.

项目描述:

加拿大-中国农业与食品发展交流中心有着丰富的水稻相关产业经验,对水稻种植业有着深刻的了解。中心多年来一直从事加拿大水稻产业开发研究和加拿大方方面面建立广泛联系。 中心现寻求投资者合作,在加拿大安大略省建立一个规模在三万到十万中国亩的水稻生产基地。从生产、加工、到包装采取一条龙的流水线运作模式,生产优质天然大米。 为加拿大,中国和世界人民提供全自然风味的大米。请有意者与中心咨询联系。

项目名称:加拿大有机生猪养殖出口基地

Organic Pork Producing Center

项目类型:新建股份有限公司

Co. Ltd

投资方式: 合资

Joint Venture

所属行业: 农、林、牧渔业

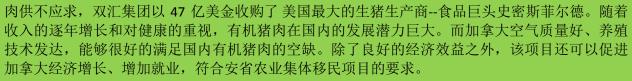

Agriculture and Animal Husbandry

项目地点:加拿大安大略省

Ontario, Canada

建设该项目优势条件:

随着人民的生活水平提高,中国猪肉的消耗量逐年增长。中国是世界上最大的猪肉生产国和消费国。2012年中国人均猪肉消费 86 磅,而 2002 年为 70 磅。正是由于猪

With the increasing live standards, China witnessed a growing number of consumption for pork. China has consumed the largest number of pork in the world. In 2012, the average consumption of pork per person reached 86 pounds, which was the amount of 70 pounds in 2002. Because the supply did not adequate to the demand, SHAUNHUI Group purchased the largest pork producer—Smithfield. The organic pork has a large potential in China with the increasing income and health concern. Canada has high air quality and advanced techniques. Producing pork in Canada could fulfill the gap between high demand and poor quality in organic pork. Besides the economic benefits, the center can play a positive role in economic and increase employment; Ontario government legitimated this program into an immigration list.

项目描述:

加拿大中国农业与食品发展交流中心常年关注国内和加拿大猪肉的走势,对加拿大行业和市场有着深刻的见解。中心现寻求投资者合作,建立规模在年产 50-100 万头外向有机猪肉生产基地,所有猪肉以零添加、无抗生素的自然生产模式。请有意者与中心咨询联系。

Focusing and researching about the pork industry in China as well as Canada, Canada China Agriculture Center has various experiences and comprehensive understanding in the pork industry. Now we are looking forward investors to set up an export pork producing center with the acreage from X to X Chinese Mu. The farm would implement additive-free and free range modules and produce organic pork. If you are interested in the program, please contact us.

所属行业: 农、林、牧渔业

Agriculture and Animal Husbandry

项目地点:加拿大安大略省哈密尔顿市

Hamilton, Ontario, Canada

建设该项目优势条件:

随着国内对加拿大食品的市场需求不断增加,中心收到大量国内进口商的收购意向。同时随着国际大型超市如麦德龙、家乐福等大批量入住中国,中国消费者对于从大豆到葡萄酒等进口产品的需求和要求都不断上升。投资加拿大出口中国可谓是"钱景"良好。除了良好的经济效益之外,该项目还可以促进加拿大经济增长、增加就业,符合安省农业集体移民项目的要求。

With growing demand of Canadian products in China, Canada

China Agriculture center has received many emails and phones from importers in China, who intended to purchase Canadian agriculture and food companies. Nowadays, international supermarkets, such as Metro and Carrefour, all debarked in many cities in China. The increasing numbers of international supermarkets opened the mind of Chinese consumers and caused more and more demand of imported products such as soybean and wine. Therefore, investing in a Canadian export company has a large potential to make profit. Besides the economic benefits, the center can play a positive role in economic and increase employment; Ontario government legitimated this program into an immigration list.

加拿大-中国农业与食品发展交流中心一直和国内进口商以及加拿大出口商有着紧密联系,对进出口事宜十分了解。现寻求投资者合作,建立从大豆、牛肉到葡萄酒等一系列农、畜牧业产品的贸易出口中心。希望对中国市场和销售渠道有一定了解的、具备一定经济实力和进出口经验的投资者与中心联系。中心会负责收购、包装、出口以及政府各项支持的相关事宜。
